IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:	Christopher C. Broder et al.)	
Application No. 10 /5	528.800)	Art Unit: 1648
ippileution 100. 107.	20,000	j –	7 Ht Cint. 1010
Filed: March 31, 2006)	Examiner: Benjamin P. Blumel
C)	Car Carration No. 0100
•	ns and Methods for the Inhibition ne Fusion by Paramyxoviruses	1 <i>)</i>	Confirmation No. 9160

COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

In response to the Examiner's Statement of Reasons for Allowance in the Notice of Allowability dated September 30, 2009, the following comments are submitted under 37 C.F.R. 1.104(e).

Applicants note that the Examiner has correctly pointed out that the prior art fails to teach the use of SEQ ID NO:s 1 or 2 in inhibiting the viral fusion with a cell or the induction of an immune response in a subject. Applicants further note that the Examiner has also correctly pointed out that the Bossart *et al.* 2002 Journal of Virology article was published after conception of the claimed invention. Applicants, however, do not acquiesce to the indication that March 23, 2000 represents the conception date.
